

Creating Better Environments

Sustainability is about the
things you can't see

Forbo

FLOORING SYSTEMS

We believe in creating better environments

From how they're made to how they perform, we make outstanding floors that are truly sustainable.

That's because our floors are good for people, good for buildings and good for the environment.

So, from the building they're in to the world outside, we're helping our customers work, live and relax in better environments.

It's about the things you can't see

A Forbo floor is always beautiful and stylish to look at. A floor that's comfortable to live, work and play on.

But looks aren't everything; often, it's the things you can't see that really matter.

At Forbo, we believe that true sustainability comes down to two things: how a floor is made, and how it performs.

DON'T
GIVE
UP

Marmoleum: A natural talent

Forbo's Marmoleum is made from 97% natural raw materials.

So it's no surprise that it is the world's leading sustainable resilient flooring. Marmoleum is what it is, a genuine, authentic product.

Entrance: Keeping the world outside, outside

We offer both rigid and textile entrance flooring products that can stop up to 94% of dirt from being walked into a building.

This means a cleaner interior with less cleaning needed, a safer environment and lower cleaning costs.

Carpet tiles: Closing the loop

Not only do all our UK-produced tufted tiles have over 50% recycled content (by weight), we can reprocess production or installation waste and close the loop.

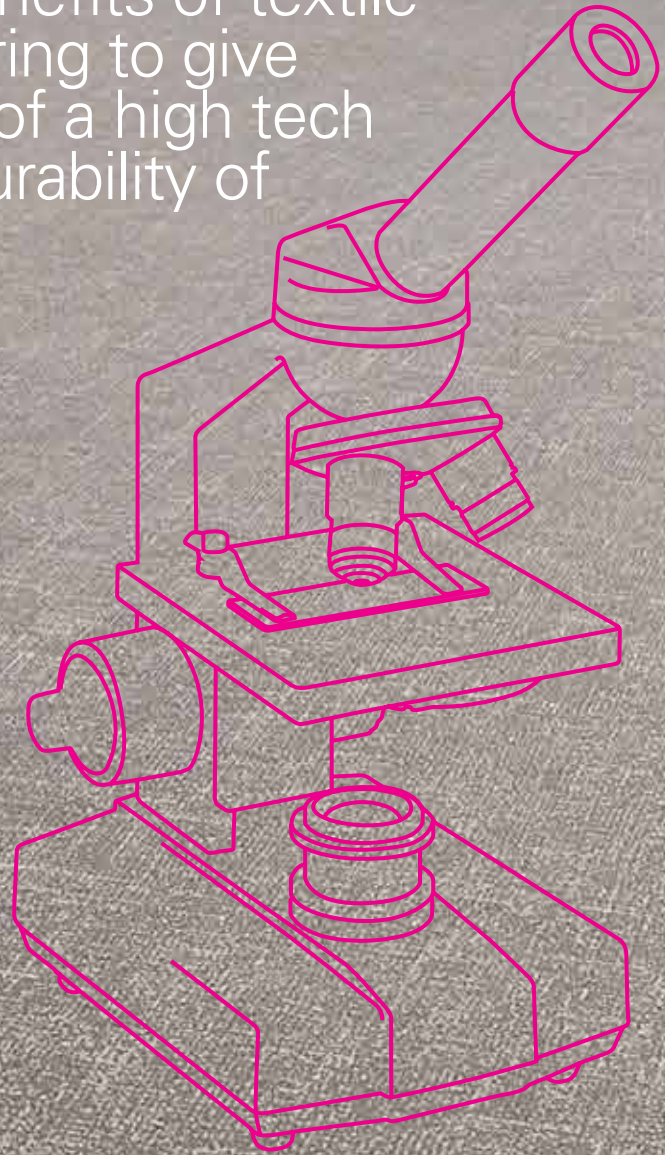

Vinyl: Making vinyl better

Whenever possible, we repurpose our waste vinyl (and that of other flooring manufacturers') to make new products – such as the backing for Flotex and Westbond carpet tiles.

Flotex: Greater than its parts

Our unique hybrid flooring combines the benefits of textile and resilient flooring to give you the comfort of a high tech carpet and the durability of a resilient floor.

Green certification

We use several transparent independent third party certification systems for our flooring products. We're also keen to include our products in the building rating systems for a sustainable environment.

It's good for Forbo because it helps us share our sustainability story and spot opportunities to improve.

And it's good for you because it shows that other environmental experts agree that our floors are among the most sustainable and high performance available.

The **Nordic Swan**, **Blue Angel**, **Cradle-to-Cradle**, **BREEAM** or **Nature Plus** are just a few of the sustainable product labels that Forbo complies to. The Environmental Product Declarations [EPD] means that our products also qualify for all of the leading environmental building rating systems.

Just visit www.forbo-flooring.co.uk/CBE to find out more.

Environmental Product Declaration (EPD)

Forbo Flooring Systems has published Environmental Product Declarations for our individual floor covering products. An EPD presents quantified environmental data for a product, based on information from a life cycle assessment (LCA). An EPD is a third-party-verified report that summarises and explains the data generated from an LCA.

All our EPD's can be found on <http://www.ul.com/global/eng/pages/offerings/businesses/environment/databasesearch/iframe/>

LEED

[Leadership in Energy and Environmental Design]

LEED is the most widely used environmental certification programme in the US, and is recognised internationally.

This programme awards ratings based on the whole performance of a building, instead of individual products, such as flooring.

To find out more about our LEED ratings visit www.forbo-flooring.co.uk/LEED

To find out more information about our flooring or sustainability at Forbo Flooring Systems, speak with your local Forbo area manager or visit www.forbo-flooring.com/CBE
