

**"Mondo3" Theater in Moglia**

This project made it possible to restore the Theater in Moglia, after the earthquake hit the Italian northeastern regions in May 2012. The «Mondo 3» theater in Moglia was restructured by observing its original octagonal layout. It was also improved with state-of-the-art plants and by applying energy-saving principles. The floor covering chosen by the Interior Design Team was Flotex Calgary by Forbo.
