

. PM Play

. PM Play designed by SWID studios is setting new standards for children's play centre! Inspired by nature – the idea of a forest garden, treehouse, and the future of digital technology. The colours and materials used were inspired by nature, such as fallen leaves, pebble stone paths and mossy gardens, this stunning bright and welcoming playroom was designed to create a space that is inspiring yet safe for children. To support the design motif, Surestep Laguna slip-resistant flooring was used as the main finish, this muted and sophisticated safety flooring offers bright visuals with holographic particles that are aesthetically pleasing as well as combining barefoot and footwear slip resistance keeping children safe as they play.
