

2020 Eternal - AARHUS UNIVERSITY HOSPITAL

Forbo Eternal is a sheet form of sustainability vinyl. It has a high-level of recycling material (The back 60 pct.) and it is of cause free for phthalates and softener. - Architects call tree on a roll; Eternal, which for instance were chosen for the bed bays at the new Aarhus University Hospital in Skejby. With Eternal you get the best of two worlds: The trees fine structure and patterns together with the vinyl lengths sturdy surface without seam and notch, which is always easy to clean. - Eternal can all what a floor should could in the demanding environment and at the same time have the exact right expression, that reminds us of home. It tolerates drives with heavy equipment (as patient beds) and to that the soft vinyl contribute for a good acoustic, bring out the architect sources from project adviser DNU, The new University hospital. A new collection of Eternal is just sent out: Design vinyl is now chosen for lifestyle environments as cafes, fitness studies and lounges. - The new tree design range and similar with inspiration from herringbone patterns, marble and concrete is highly demanded, because they speak a modern and relevant language, it is told in a statement by Forbo Flooring A/S. The expansion of Eternal collection includes a new line of attractive designs and new possibilities for designing a floor which color graduate.
