

Agence Omada

OMADA Architects in Châlons-en-Champagne has renovated some of its buildings with Forbo Flooring. They opted for a unique décor thanks to 100% customised flooring. Flotex Lab was installed in the meeting room. OMADA Architects wanted to represent the cadastral map of Châlons-en-Champagne, bringing vibrancy and colour to the room for a sensational result. Flotex flooring stands out for its technical and acoustic performance. In the break room, the architects opted for Eternal Lab with monochrome patterns, designed by themselves to add a touch of originality. This covering is highly resistant to heavy loads and has remarkable acoustic qualities. Linoleum bulletin board was also installed in the break room. It's an essential element for hanging photos, memories, postcards and post-its.
