

Almedalsbiblioteket

Almedalsbiblioteket (The library of Almedal) is Sweden's only integrated public and university library, located in direct connection to Campus Gotland between the harbor and the park area Almedalen in Visby. The library struggled with old wooden floors that were hard to clean, and also struggled with bad acoustics. Forbo's Flotex solved both of these problems.

Maitrise d'oeuvre Uppsala Akademiförvaltning
