

Amstro

Amstro is a modern office designed with premium quality and style in mind. The space boasts open and collaborative areas that encourage teamwork and innovation. In addition to the open spaces, there are various meeting rooms equipped with the latest technology, providing versatile environments for both formal and informal meetings. The fully equipped kitchenette adds a touch of convenience, making the workplace not only productive but also comfortable and enjoyable. Our Allura Flex and Allura Decibel flooring solutions were chosen to enhance the overall aesthetic and functionality of the office. Allura Flex offers a sophisticated design with a natural look and feel, while Allura Decibel excels in reducing impact noise, contributing to a quieter and more focused work environment. The combination of these flooring options provides the perfect balance of style and practicality. The impact of incorporating Allura Flex and Allura Decibel has been remarkable. The warm and inviting atmosphere created by these floors has positively influenced employee morale and productivity. Moreover, their high durability ensures that the floors maintain their beauty and integrity despite the heavy foot traffic typical in an office setting. This project highlights our commitment to creating workspaces that are not only visually appealing but also promote well-being and efficiency.
