

Astra Zeneca, Warsaw, poland

AstraZeneca, an innovative biopharmaceutical company, set out to expand the Warsaw office. In addition to creating jobs for another 500 people, the investor wanted to create the real heart of the office - a space different than the existing one, the true AstraZeneca community center. In addition to Agora, many conference rooms have been designed throughout the office, "focus rooms", design work zones and other corners adapted to different types of work. The Forbo flooring solutions were installed in the Astra Zeneca office. The office was designed by The Massive Design Studio.
