

Athy Library, Co Kildare

“The works comprise the conversion of a former Dominican Church, a protected structure into a Town Library. Our goal was to retain the unique character, spatial and light qualities of the church while also providing a functional & comfortable library space. We chose Forbo as our flooring partners due to their great quality and durability, along with their fantastic range of colour and texture choices. The colours were selected to emulate the stained glass windows and has been very successful.” Walter Holden MRIA
