

Ausonia offices

Ausonia de Serveis S.A. is a taxation, labour and accounting consultancy with more than 75 years of experience. The interior design aims to reflect the spirit of the company and its modernity, transparency and confidentiality. Having a quiet office environment was an important requirement when designing the office. The floor covering played an essential role in the design to ensure proper acoustics.

Flotex is a unique textile floor that combines strength and durability with the comfort of a carpet and the visual suggestion of concrete. The characteristics of Flotex offer excellent acoustic properties. Flotex flocked flooring is available in sheet, tile and plank format.
