

**B Street Residence**

Bulletin Board is a flexible and easy to cut, combine and handle material, which allows you to create functional wall decorations with enchanting decorative effects. Architect Caroline Di Costa utilised these material properties to create an amazing custom bulletin board artwork for a residential project. Bulletin Board pin board linoleum is produced from natural and renewable raw materials. A combination of oxidized linseed oil, rosin and finely ground cork gives Bulletin Board its flexibility and resilience. This combination results in a product with exceptional durability & a carbon neutral sustainable footprint.
