

**Børnehuset Espelunden Kindergarten**

Because of her great experiences from previous construction projects, Thilde Kristiansen, the head of construction affairs Rødovre district, had no doubts that the new floors at Espelund Kindergarten should be made with Forbo linoleum: "Forbo has several collections and colours to choose from, all with a nice durable finish". In collaboration with the design adviser Cphrumdesign, a design concept has been developed for an adventure house for children: Sturdy frames with soft and warm qualities. With rooms to play as well as rooms to sit and read. On all the floors Marmoleum Splash has been installed. Forbo Furniture Linoleum is applied on the play- and reading houses and on the tables. "Both Furniture and Marmoleum Splash give the space a good acoustic environment and the materials are pleasant to be around", Henriette Strøm design architect from Cphrumdesign comments on.
