

BUPA

For the new office of one of the UK’s leading healthcare specialists, workplace interior design specialists, ID:SR – Sheppard Robson, specified the natural beauty of Forbo Flooring Systems’ Allura Flex Wood Luxury Vinyl Tiles (LVT) to help ‘bring the outside in’. Occupying the first and second floor of a new seven-storey Grade A office building in Leeds, the healthcare specialist has brought over 250 staff together into one co-located environment. Expertly designed by ID:SR, the 25,000 sq ft space comprises a variety of agile work and social settings to support a range of activities, a dedicated client reception, meeting suite and lounge. Allura Flex Wood was fitted in a herringbone pattern in the main reception and staff breakout areas. Thanks to its tackified installation, the high quality, dimensionally stable Allura Flex tiles provides answers to key issues such as limiting valuable downtime, the re-use of floors and minimising environmental impact, perfect for busy office spaces. What’s more, Surestep Material in Cool Concrete was specified in the kitchenette of the staff breakout area, where there is an increased risk of slip. The safety flooring combines outstanding slip resistant properties with differentiated design and through the use of Step Crystals, the natural colourway offers a clean, fresh look and improved cleaning and maintenance properties. The PUR Pearl finish ensures that it is stain and chemical resistant.
