

BaptistCare Glendale Lodge

At BaptistCare’s aged care home, the flooring needed to deliver comfort, acoustics, and ease of maintenance while supporting strict infection-control standards. Feel homely and welcoming for residents, yet robust enough to handle daily wheeled traffic. Forbo’s Sarlon 19 dB acoustic flooring, featuring warm timber and subtle textile designs, was selected for its unique balance of performance and ambience delivering low-noise environment that supports the well-being of residents without compromising hygiene or durability
