

Basketball South Australia

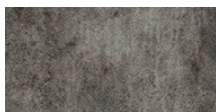

Game changing flooring for Basketball SA Basketball SA manages one of South Australia's busiest sporting facilities, welcoming hundreds of athletes, coaches, and spectators each week. In 2022, Flotex was installed throughout the high-traffic common area, linking the main entrance, café, and viewing zones. The flooring needed to handle constant use from training sessions, youth programs, tournaments, and community events all while staying clean, safe, and presentable. Flotex stood out for its unique construction: a textile floor with resilient performance. It offers the comfort of carpet with the durability of commercial vinyl, featuring densely packed nylon 6.6 fibres and a waterproof, washable backing. Cleanability has been a standout benefit. Flotex resists stains, traps allergens and dust, and can be deep cleaned with ease helping the facility maintain a hygienic, professional environment with minimal effort. Its reliable slip resistance, even when wet, makes it a safe choice for mixed-footwear zones. After two years of proven performance, Basketball SA will extend Flotex into the court-side seating area in 2025 backing a flooring solution that plays as hard as they do.
