

Beachhotel Zoomers

Arthur and Carina are already owners of the Zoomers beach pavilion, and a sustainable hotel on the Castricum beach plateau has now been added. Beachhotel Zoomers is energy neutral built with natural and sustainable materials and systems. That is why a conscious choice was made for Marmoleum Solid from our Cocoa collection. The use of cocoa shells, a residual product from the cocoa industry, ensures an even more sustainable character of the floor. The rooms are not placed directly next to each other. The layout is loose. No boring hotel corridors, but open spaces between the rooms that all have different dimensions. From the "beach room" in the new hotel you look out at the beach and the sea. Waking up to the sound of the surf and sea view, who doesn't want that?
