

**Bekind. Köln**

bekind. is more than a furniture brand. It is an attitude to produce multifunctional furniture for generations and to establish a sustainable furniture culture using regional FSC-certified solid wood and natural linoleum. Timeless design meets renewable raw materials and Cologne craftsmanship. The focus is on a long service life and sustainability. Reason enough for Forbo to become involved in the start-up company founded by fathers. With the Furniture linoleum collection, the company supports bekind's sustainability concept. Furniture Linoleum consists of 100% renewable raw materials and was developed especially for application on furniture surfaces. The unmistakable haptics and silk-matt, pleasantly warm surfaces give the multifunctional furniture an unforgettable living experience. A fresh design is provided by the rich color palette of trend colors and warm natural tones. Whether fiery salsa, fresh aquavert, subtle pistachio green to dignified pewter grey: the color selection leaves nothing to be desired - just like the characteristics of the Furniture Linoleum collection.
