

Birmingham New Street Station

Forbo Flooring System's Nuway Tuftiguard entrance matting system has been installed in phase one of the redevelopment of Birmingham New Street train station, to help minimise the risk of slips and trips. Accommodating over 140,000 passengers embarking on journeys from the station everyday - making it the busiest interchange station in the UK - the demand to keep the thousands of visitors safe was of utmost importance.

Location	Birmingham, United Kingdom
Installation by	SDS Matting
