

Brusivo s.r.o. plant and offices

Architect Jiří Zábran selected the first-class environmental friendly linoleum floor covering, as he already had very positive experiences with it for many years. Verified is its durability and performance under heavy traffic. In the interior, he reflected both his favorite saturated colors and neutral grey tones. Moreover, this natural floor covering is in line with the ecological feeling and vision of Brusivo s.r.o. The colors Marmoleum Patterned Signo and Scenario are no longer in collection. For similar designs please explore our Marmoleum Piano range.
