

Bureaux d'expédition SODEBO, Montaigu

For the SODEBO shipping office redevelopment project, the architect enlisted the help of Forbo Flooring Systems to select flooring. The product chosen is The Flotex, a flaky textile flooring known for its acoustic properties, walking comfort and ease of maintenance. The Flotex vision collection offers a wide variety of images with striking realism. Flotex's HD printing technology provides images of natural materials such as wood. The Flotex floral vision collection features a selection of original floral motifs, ranging from abstract flowers to graphic flowers.
