

CEF Gràcia

With nearly 50 years of history, the Centro de Estudios Financieros (CEF) is one of the largest professional training centers in Spain. For their Barcelona offices, they sought a product that would add design and value to their center. They chose Forbo's Allura flooring, which met all their requirements: design, durability, and easy maintenance. The result is a modern, functional space that enhances the learning environment. The CEF team is very pleased with the outcome.

Installation	Pavicomsa
Location	Barcelona
