

Caisse d'Epargne Euromedecine

The Caisse d'Epargne Languedoc Roussillon has entrusted RF Design with its second office renovation project. A complete plateau of about 900m² on the Euromedecine site. "Continuing the concept of" Parcours de la région Languedoc Roussillon "realized in 2018, we proposed a territorial concept, built around the identity and values of users. The choice of Flotex soil was obvious to become support of our choice colorimetry. The Flotex Lab solution allowed us to customize this existing range with colors calibrated to our visuals. We were able with Forbo designers to completely re-color the 6 colors that make up the motif and find the right color combinations with our territories. A number of prototypes were needed to validate these choices.
