

Care center Scheldehof

The care center Scheldehof was completed at the end of 2017. It is a former shipyard in Vlissingen, based on the Heavy Plate Workshop of the Scheldt Quarter. Industrial heritage thoroughly rebuilt with the construction of a new wing. The building includes 91 nursing homes and 52 apartments for seniors. On the ground floor of the complex a grand cafe, studio, theater, and several course and meeting rooms are located. In the atrium a winter garden has been created. The starting point for the interior was homely, authentic and to avoid the character of an institution. Forbo Marmoleum Concrete floors meet all these properties.

Projekta nosaukums	Woonzorgcentrum Scheldehof
Adrese	Vlissingen
Fotogrāfs	Ronald Tilleman Photography
Datums	december 2017
Interjers	Thijs Klinkhamer
Būvnieks	Bouwgroep Peters
