

Care hotel UdensDuyn

Care hotel Uydens Duyn in Uden, The Netherlands, offers a luxurious environment where people can stay and recover in peace and quiet. The hotel has 55 spacious rooms. A special feature of the concept is that Udens Duyn is accessible to both guests with a care need and guests who do not need care, but who prefer 24-hour nursing care to be on standby. The Udens Duyn design combines comfort and care in a luxurious and welcoming environment. The natural, sophisticated Marmoleum Striato floor fits perfectly in this concept. The central area of the hotel is designed in the form of a canyon where light from above and wavy lines shape the space. Through the use of dome lights, daylight falls through the canyon on the ground floor.
