

FLOORING SYSTEMS

creating better environments

Centre for Addiction and Mental Health

The Centre for Addiction and Mental Health is a psychiatric teaching hospital located in Toronto. This two-building, 570,000 sq ft addition to the CAMH offers a new approach to behavioral health design by creating a warm, welcoming and comforting environment. The project was awarded LEED Gold certification, recognizing its commitment to sustainability. Forbo was awarded the flooring contract through a P3 (Public-Private Partnership) process. The sustainability and environmental friendliness of Marmoleum appeals to the CAMH. Marmoleum floors were also used in earlier phases of the CAMH redevelopment.
