

Centre hospitalier, Chaumont

The Chaumont General Hospital construction dates back to the 18th century. In 2000 was built the new technical platform, consisting of two buildings, with on the one hand the emergency services, medical biology, EMS, SMUR, and also medical imaging, intensive care unit, central sterilization and biomedical service.

For this building site, many Forbo products were selected as Artoleum, Fresco and Dual Marmoleum, EC Colorex and Sarlibain solutions.
