

Changing rooms – football clubs, Roskilde

“Both places needed to expand the sports facilities with changing rooms, and with a limited budget we still wanted both a solid building, but also a building that could contribute with experiences. The colored interiors helped to give the users an experience - when you spend a quarter of an hour bathing and change clothes, you could to a greater extent allow intense coloring. The strong colors always receive a comment. Sometimes the darker colors are especially provocative, sometimes we are told that it is fun, exciting or uplifting to use the different rooms. Where you usually see that changing rooms are not at all noted, we now find that users quickly select a favorite room or color they prefer. With the sky light, the color tones of the room change as there are skylight windows”, Sabine Holstein / Architect, Builder Adviser
