

## Childcare KION - Klimop

KION developed a new interior concept for all 180 locations in and around Nijmegen. Annemieke Brinkhoff, Kion's educational furnishing advisor: "You cannot see interiors and educational vision separately. You have to be able to tell that you are stepping inside at KION by the style, the colors and materials, but precisely also by the rich corners and the way we offer play materials." To optimally establish KION's new corporate identity, Annemieke asked De Beleving to create the plan and supervise implementation. A friendly, warm and natural look was chosen. After all, the children stay there all day. Eternal wood supports the new house style optimally with its unique wood designs. In the toilets there is Sphera Element, a slightly different look and a hygienic, very closed surface where no unpleasant odors can penetrate.
