

## Chungnam Library

Chungnam Library is a multi-purpose cultural space with facilities like a library, exhibition room, auditorium, conference room and lounge. Because of the glass walls, a lot of sunlight enters the area and the high ceiling creates a wide and open space. The good sound absorbing properties of the chosen Flotex flocked floors meet the requirements for a quiet library environment. The cushioned backing of Flotex not only reduces the noise, it also gives a comfortable look and feel.
