

Cihangir Bahçeşehir Campus

All the interior elements used in the Cihangir Bahçeşehir Campus are designed and implemented in accordance with child psychology and safety. This should not be exhausting because it is a school and a place where children spend more time away from the house, on the contrary it must be encouraging, attractive and fun. Bringing children to a taleful world with their eye-catching colors! Importance: The project, which is entitled to obtain LEED Certificates with environmental preferences, uses the Marmoleum, Flotex and Sarlon Traffic series which are resistant to hygienic and intensive traffic.

Location	İstanbul, Türkiye
