

**City Sport Munich**

In the heart of Munich's Maxvorstadt district, Head Coach Manuel Fontes and his professional team have specialised in personal training with "Stadtsport München" - and at the highest level. Founded in 2009, the team consists of highly trained experts with academic degrees and numerous additional qualifications. The trainers place this high-level demand not only on their daily work, but also on the equipment and interior of their studio: as part of the renovation in 2021, the decision was made for a modern-purist room concept with a clear colour language that continues from the floor to the walls to the room ceilings. With the choice of "Marmoleum Sport Elastic" linoleum from Forbo Flooring, Stadtsport München is setting standards in terms of hygiene and also sustainability, especially in times of the pandemic: all floors are wet cleaned and disinfected daily. Marmoleum is naturally antibacterial, consists of 80 per cent renewable raw materials, is biodegradable and produced in a climate-neutral way.
