

Clínica Tambre Alicante

The Clínica Tambre, a leading name in Advanced Reproductive Medicine, has chosen Forbo's Sphera Element and Sphera SD collections for its new state-of-the-art center in Alicante. These flooring solutions were selected for their perfect balance of design and functionality, making them ideal for highly controlled environments. The Sphera Element collection stands out for its modern aesthetic and neutral, luminous color palette, which enhances the sense of cleanliness and openness. This contributes to creating a welcoming and serene space for patients and staff alike. In critical areas, Sphera SD provides superior electrostatic discharge control, ensuring the safety of sensitive equipment in laboratories and operating rooms. Both collections meet the highest environmental and hygienic standards, offering durability and reliability in settings where control and precision are paramount. By combining cutting-edge technology with visual appeal, Sphera Element and Sphera SD have become the perfect choice for Clínica Tambre Alicante, aligning seamlessly with the clinic's commitment to innovation and excellence.
