FLOORING SYSTEMS

creating better environments

Clatterbridge Hospital

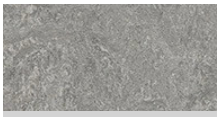

An extensive range of Forbo Flooring Systems' products have been installed throughout Liverpool's first-ever dedicated Cancer Hospital: Clatterbridge Cancer Centre – Liverpool (CCC-L). The new centre will care for people across Merseyside and Cheshire, and those in the surrounding area, providing highly-specialist care including pioneering immunotherapy and the most advanced forms of radiotherapy. BDP, the international practice of architects, designers, engineers and urbanists, were appointed to design the whole CCC-L building, including the interior and landscaped spaces. Arranged over 11 storeys, BDP decided to provide each level of the building with its own identity, which was achieved by choosing a different colour scheme for each floor. For example, for the ground floor and main entrances BDP specified an array of finishes – including the flooring – in relaxing and comforting green shades, while the chemotherapy suite on the sixth floor featured soothing purple hues.

Location	Liverpool, UK
