

Club des Sports

The Courchevel Sports Club has a strong reputation. Founded in 1948, its aim was already to train great sportsmen and women and instill sporting values during the various training sessions for downhill skiing, ski jumping, cross-country skiing and biathlon. In 2021, the Club will be modernised with new flooring. In the entrance hall, the Sports Club had its logo inlaid on a Coral clean carpet using our perfect made-to-measure solution to create an excellent first impression as soon as you enter. This customised mat retains dirt and moisture, helping to protect the building's flooring. Studio Arch chose the Flotex natural collection with a brown wood decor to cover the floor in the bar-restaurant and cloakrooms. This colour is reminiscent of the wood found in many mountain chalets, and adds a refined touch to the interior design. Sarlon Traffic flooring was also laid in the gym and on the stairs.
