

Columbus Energy office

The ecological pedigree and activities of Columbus Energy allowed us to adopt the assumption that the office would reflect sensitivity to nature and be a place to work full of passion. The main idea of the project was to refer to broadly understood nature. Flora and fauna are visible both directly, by introducing plants inside, and indirectly, using natural materials, those whose production reduces the negative impact on the environment and can ultimately be recycled.

General contractor	BBC9 Mix Group
Reference Interior Architect	Chlebienis + Poklewski
Photographer	Fotomohito
Location	Kraków
Date of completion	2021
