

Company Rapos s.r.o.

Architect has connected the main material usually use in the construction industry – bricks, concrete, metal, wood and glass for this building – headquarter of the construction company Rapos. He added to the previous mentioned material the textile floor covering for interior. Has selected the flocked flooring Flotex for its durability, high performance under the heavy traffic. Design of Metro in the grey color match the contemporary interior. He used the functionality entrance flooring system Coral Duo for the entrance area, which is the best class solution for the short entrance.
