

Conversion Works Tower

An inspiring space to do exceptional work. At Conversion Works we strongly believe in a fully integrated approach to shaping spaces. Our goal is therefore to combine a meticulously reasoned functionality with an authentic personality. The characteristics of the space, the location and the client create the overall identity of each individual project. This vision gives us the ability of shaping extraordinary spaces. On the floor is the Flotex by Starck collection. Colours that fit perfectly within the inspiring character of the building and that enhance the inside out feeling even more.
