

Council on Energy, Environment and Water (CEEW)

The Council on Energy, Environment and Water (CEEW) is one of Asia’s leading not-for-profit policy research institutions. CEEW uses data, integrated analysis, and strategic outreach to explain – and change – the use, reuse, and misuse of resources. When CEEW envisioned to set up their new office, they wanted to use a sustainable floor covering which would complement their work on sustainability. Also, they wanted to have a vibrant and welcoming office as this office is visited by prominent government officials including ministers. And what better than Marmoleum when it comes to sustainable floor coverings?? We were glad to assist them with Marmoleum along with our Tessera range of carpet tiles. Marmoleum is not only sustainable, it’s beautiful as well. These images are the testimony of the fact. What a beautiful office they have built!!

Location	New Delhi, India
Architect	Rajiv Syal, ABD Design Studio
Date of completion	2022
