

Crelan Barvaux-sur-Ourthe

For Crelan's new office in Barvaux-sur-Ourthe, LiquidDesign was chosen. The unicolour without seams and the sensitive appearance of this material were the decisive factors for selecting the floor covering. LiquidDesign clearly stands out from other liquid floors such as PU or epoxy. It is the result of a balanced mix of natural components: cork, vegetable oil and biopolymer binder. This innovative Forbo Eurocol liquid floor offers a completely different experience thanks to its permanently flexible properties, natural look & feel and aesthetic qualities.
