

**Dankook University Dental Hospital**

Hospitals should use floor materials suitable for medical spaces that can comply with strict hygiene regulations due to concerns about infection as a space used by many patients and visitors. Marmoleum's ability to inhibit the growth of bacteria stems from the natural raw materials that go into its production, namely linseed oil. Eternal is strongly durable, and modern colors sure to complement to interior design. Both products can be welded to prevent bacterial growth that can occur in gaps.
