

Danone Office

Danone is a leading international food company with a presence in over 130 countries worldwide. For this office space, the ZIKZAK Architects team implemented multi-level zoning, including the use of floor coverings. The flooring contractor chose solutions that allow for a clear division of functional areas while maintaining the visual integrity of the space and a uniform floor height. Tessera Layout & Outline, Tessera Cloudscape and Tessera Basis Pro were used in workspaces, meeting rooms, and acoustically sensitive areas. It provides comfort, noise reduction, and flexibility in zoning. Sphera Energetic and Eternal Material were used in areas with high traffic and wear resistance requirements. All materials were selected to blend together in terms of thickness and technical specifications, allowing for installation without height differences or visible transitions. The total area covered is 1,600 m².

Project name	Danone Office
Location	Ukraine
Flooring contractor	MDT Group
Interior designer	ZIKZAK Architects
