

Das Elb Hotel Magdeburg

Elb Hotel in Magdeburg is a true oasis for travelers looking for accommodation in the historic city. Fantastically located directly on the Elbe River and equipped with modern facilities, the hotel is an ideal hub for a successful stay in Magdeburg. The hotel has a variety of rooms that are tastefully decorated and offer guests every comfort. Whether you're traveling alone, as a couple or as a family, the Elbsporthotel has rooms to suit all needs. Most of the rooms open a breathtaking view of the Elbe River, which makes the stay even more unforgettable. The synthesis of modern comfort, first-class service and the dreamlike location makes this hotel a first-class choice. This newly constructed hotel was built due to past devastating flood events. The previous building was flooded several times, so the hotel was rebuilt in the same place, but this time flood-proof. The architectural firm arc architekturconcept GmbH. Lauterbach - Oheim - Schaper created a dynamic building structure that suggests the effect of a stranded ship due to its transverse direction. For the interior design, the architecture firm opted for timeless beautiful floor coverings from Forbo Flooring in subtle shades of brown and gray: - Enduro, among others, provide the modern ambience of the rooms. This is because design flooring offers an attractive combination of aesthetics, durability and ease of maintenance, making it an excellent choice for hotels. - In the hallways, where many guests walk up and down, Flotex textile flooring was chosen primarily for its excellent impact sound insulation. The high foot traffic in the hallways is not a problem for the textile flooring, as Flotex can even be wet cleaned and is extremely durable. - In order to keep dirt and moisture out and to protect adjacent floor coverings, a functional entrance flooring system was planned that is optimally suited to the hotel's entrance area. For this reason, the Elb Hotel Magdeburg could not do without a Coral entrance floors from Forbo.
