

Daycare centre Zazou

An old kindergarten had been empty for years and looked like this. The inside is completely stripped. The ceiling in the entrance and hall are opened diagonally upwards towards a large skylight for a particularly light entrance to the building and a pleasant route deeper into the building. Smart design has created 3 group rooms with conveniently accessible and shared support rooms such as bedrooms, changing room, laundry room and team room. Marmoleum Striato was chosen for the group rooms and Walton from the Marmoleum Solid collection is located in the hall
