

## De Bron

De Bron in Lanaken is a public building where part is a library and the other part is offices and a doctor's office where small children can be measured and weighed and receive a doctor's consultation. The LiquidDesign floor was chosen because of its ability to create a cast floor on an old stone floor with an ecological product. The architect chose Flotex flocked flooring because of its ease of cleaning, colour richness and good sound absorption properties.

Adrese	Lanaken, Belgium
