FLOORING SYSTEMS

creating better environments

Decathlon store

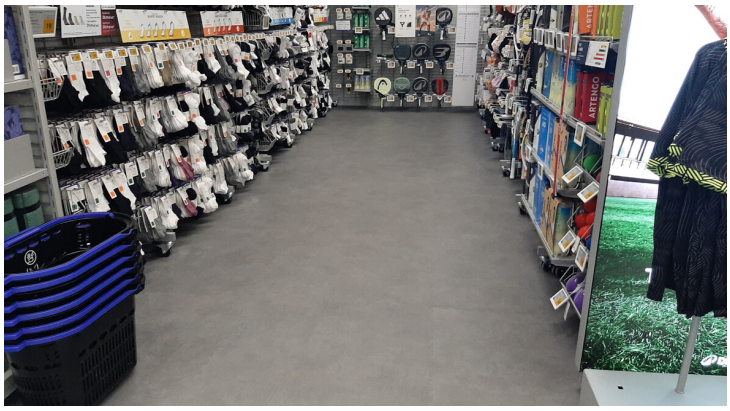

Allura Puzzle tiles have been fitted in the retail area of the Decathlon store. Allura Puzzle flooring requires minimal subfloor preparation, is quick to install and is ready for use straight away. The strong and stable 'puzzle'-style interlocking between the large-format tiles ensures excellent dimensional stability. The product is ideally suited to 'loose-lay' installation in high-traffic areas. In Decathlon shops across Poland, it has been laid over existing concrete or ceramic tile floors and is performing very well.

Location	Poland
Installation by	Firma Tapipol z Wrocławia

Used Products

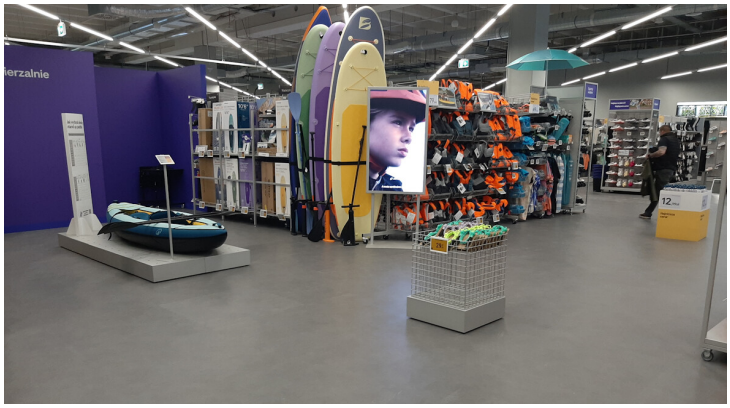

Allura Puzzle natural concrete (96x96 cm)
