

Della Chiara srl Unipersonale

With Della Chiara srl Unipersonale a flexible, multipurpose Forum space has been created to accommodate exhibitions, conferences, music and screenings. The Forum can be modified to match the needs of the event, thanks to the presence of sound absorbing curtains that help to organize the space. Forbo's Flotex floxed flooring was chosen for its technical features, especially its sound reduction performance - crucial for a location where several conferences may be held at the same time. The Flotex tile version was chosen to obtain a pleasant checkered effect.

Località:	Tavullia, Italy
