

Dental center army base

The Major General Kootkazerne in Stroe has the scoop with a brand new healthcare and dental center. The virtually energy-neutral building with approximately 300 solar panels on the roof accommodates, among other things, consultation, examination and treatment rooms, a laboratory, a clinic and a pharmacy. It shows that the Ministry of Defence has also taken a step towards sustainable, energy-efficient and efficient buildings. A Marmoleum floor is a logical choice.
