

**Dr. Gasina Private Clinic**

The Dr. Gasina Private Clinic in Latvia is designed to feel like a home - a calm, warm and relaxing environment. Natural oak, gently coloured accents and bespoke flooring create this homely look and feel. The arrow pattern on the floor has been created with Forbo Eternal digitally printed vinyl, and indicates the direction and encouragement of going forward. The challenge for this private clinic to create the most enjoyable environment for worried patients has been successfully done.
