

EHPAD Domusvi

Domusvi, a home for the dependent elderly (EHPAD) in La Tour de Salvagny, France, has all the comforts of modernity. Residents and their families can enjoy relaxation outdoors, while the living spaces are spacious and tastefully decorated. Russo Architectes opted to install Forbo's Modul'up Compact, a compact flooring that stands up to heavy loads and wheelchairs. The loose-laid flooring system is also quicker and easier to install than a glue-down installation.
