

## ELEKTROBUDOWA SA, Konin, Poland

Elektrobudowa SA in Konin is the only plant in Poland where the HV GIS switchgears in SF6 gas services with characteristic voltage up to 123 kV, and GIL busbars in SF6 gas services are produced. The clean room, located in the plant, ensures high standards of quality and cleanliness (it maintains a constant temperature, humidity and adequate air quality or ISO purity class range). Forbo Colorex tiles were chosen for the cleanroom due to the need to maintain restrictive cleanliness parameters that require the use of specialized finishing materials.
